Education:

Imperial College London

2018 - 2022

MEng Electronic and Information Engineering (Computer Engineering), 4th year modules:

- Optimisation
- Probabilistic Inference
- Deep learning

- Mathematics for Machine Learning
- Probability & Stochastic Processes
- Decentralised Finance
- Signal Processing & Machine Learning for Finance

3rd year grade: 67.7%

Wembley High Technology College

2010 - 2017

• A-Levels: Mathematics (A*), Further Mathematics (A*), Physics (A), AS-Economics(A)

Relevant Work Experience:

Aspect Capital, Investment Solutions & Quant Research Intern

March 2021 - Oct 2021

- Notable projects: Built a simulation environment for the Investment Solutions team in Python, integrated with PowerBI. It applied various vectorised methods to transform the PnL timeseries input into key statistics (VaR, CARR, Drawdowns etc) and graphical visualisations in an interactive dashboard.
 - Developed a low touch framework for **multivariate regression**, enabling colleagues to run regressions of macroeconomic variables against returns without looking at any code (**Python**, **SQL**).
- Built intraday reporting tools for the Volatility Research team in MATLAB which attributed PnL to first & second order Greeks, granting a more thorough understanding of the underlying market dynamics affecting our positions.
 - Gained familiarity with the nuances of option pricing as well as experience with productionising code (Jenkins, Docker, etc)
- Worked with **Systematic Global Macro** researchers to prepare a signal for a **research review**, this is IP sensitive so no details for you!
- Efforts culminated in a full time offer as a Quantitative Researcher!

Tudor Investment Corp, Quant Risk Analyst

July 2019 - Sept 2019

- Developing a range of tools for the Risk team in Python (Significant Bloomberg API use) used by ~10 people across £10B AUM
- Acted as Full Stack Developer managing successful firmwide deployment across business (2k lines
 of production code live)
- Aiding traders in performing market analysis by providing **statistical analysis** and **data visualisation** to their workflow

Kaiku, (https://www.kaiku.co/) - Strategy & Deals

October 2018 - December 2019

- Reaching out to & handling manual onboarding of our start-ups & Investors
- Leading the product team, deciding/creating the content for our website & social media
- Consulting entrepreneurs, interviewing understand content requirements and start-up user needs

Bloomberg, Global Data Analyst, Economics

Sept 2017 - Sept 2018

- Carrying out data analysis within **Python**, using Pandas/NumPy/Matplotlib.
- · Created a script used in monthly meetings to provide insights into stale tickers
- Data manipulation within Excel/VBA and internal Bloomberg tools for parsing data
- 100% of client queries answered within Service-Level agreement time

Other Experience:

Jane Street, Electronic Trading Competition

October 2020

 Developed a novel trading strategy in a simulated market maintaining top 10 PnL rank... It all went wrong when I replicated code without changing the trade direction, causing me to buy a certain instrument without selling, incurring roughly 300k of debt. I have learned my lesson!

IMC, Quantitative Trading Workshop

October 2020

• Learned the basics of Option theory and implemented a few interesting strategies, including deltaone hedging. Please ask me about this!

Facebook, Analytics Academy 2020

October 2020

• Performed basic statistical analysis to discover insights about user habits from multiple datasets using Python, (NumPy, Pandas, etc), and present these to a panel at Facebook

Citadel, Trading Simulation Challenge

November 2020

A comprehensive introduction into the roles of a hedge fund and market maker; challenges
included manual market making to get to grips with the concept and then an automation
challenge in python

Projects:

- Built a MIPS1 CPU simulator (C++), a C90 to MIPS Compiler (C++) and a C90 to Python translator (C++)
- Built the backend (**RESTful API in Python**) of an app for identifying & aiding the recycling of rubbish on the street, **winning** the 2019 **Google BGN Hackathon**
- Developed real-time traffic sign detection software with a Xilinx PYNQ-Z1 FPGA, using Vivado HLS
 & C

Skills and Interests:

- Proficiency in Python (PyTorch, NumPy, Pandas, Matplotlib, etc.), C++, C & Arm Assembly
- I have an interest in trivia and casual problem solving demonstrated by my participation and 3rd place position in the **Jane Street** CStimathon
- Frequently practice **Judo** (Brown belt), competing regularly in national competitions
- Member of the **Amos Bursary** which aims to enhance the professional careers of young black men through the provision of knowledge alongside academic, cultural and professional events
- Level 3 Personal Trainer and Spin Cycle Instructor
- Lover of all smooth, sexy, sultry music!! This includes RnB, Soul, Neo-Soul, Funk, etc...
